WELCOME LETTER

Dear Colleagues,

It gives me great pleasure to introduce to you the second "Middle East and North Africa Immuno-Oncology Forum MIOF -II" which will be held on November 6-7, 2020 in hybrid format at the ACC Multipurpose Room in the American University of Beirut Medical Center , Beirut, Lebanon.

MIOF is designed to tackle all aspects of Immuno-oncology practices in the different types of cancer, be it solid or Liquid.

The conference features leaders in the field of Hematology - Oncology as well as certified healthcare professionals, pharmacists and Nurses, who will provide interactive scientific sessions that includes various diagnostic and therapeutic advancements in immune-oncology.

The conference is an initiative to unite the diverse research and business communities working in this field under one roof to explore different aspects of immuno-oncology; bundled in one platform for all the oncologists, hematologists, research scholars and students to exchange their knowledge.

From Breast, Lung, GI, Prostate, Ovarian to Malignant Hematology , the program will cover the most effective initiatives and best practices across the full spectrum of cancer treatment.

This event is an effort to understand the underlying biological procedures which are amended to increase effectiveness, precision, survivability and quality of life.

I am convinced, the program will provide you with new information, better knowledge in immuno-oncology, ideas on how to improve your research and results and it will provide a stimulus to further harmonize our medical standards of practice and will hopefully lead to successfully advance the standard of care for Hematology oncology patients and improve their outcomes.

Looking forward to a successful and fruitful congress and hoping to see you all there!
